INDUSTRIAL HYGIENE FOUNDATION OF AMERICA, INC.

MINUTES

MEETING OF MEMBERS

Pittsburgh, Pennsylvania
October 21, 1964

The Annual Meeting of the Members of the Industrial Hygiene Foundation of America, Inc. was held at Mellon Institute, Pittsburgh, Pennsylvania, on Wednesday, October 21, 1964, at 11:20 a.m. pursuant to notice. Mr. E.K. Davison, Chairman of the Board of Trustees presided.

Mr. T.C. Waters, who had been previously appointed by the Chairman to examine the proxies, reported that there were 155 companies represented by proxies that were in proper form and fully executed. On motion made and seconded, the proxies were approved. The member companies represented by proxy or in person constituted a quorum. A list of the member companies represented by proxies and a copy of the notice of the meeting and proxy sent to all members of the Corporation are on file in the Minute Book.

Since there were no objections or corrections to the minutes which were mailed to all member companies following the October 23, 1963 meeting, a motion was passed to dispense with the reading of the minutes. The Chairman stated that the Minute Book was available and open at the meeting for inspection by members.

Mr. Andrew Fletcher read the following statement in memory of Dr. A. J. Lanza:

"In Memory of Anthony J. Lanza
Industrial Hygiene Foundation 1935 - 1959

It is a privilege to be asked to honor the late Dr. Anthony J. Lanza by presenting a Resolution for adoption at this 29th Annual Meeting of the Industrial Hygiene Foundation.

"Tony" Lanza, as he was affectionately known by his many friends, was one of the original founders of the Air Hygiene Foundation. Professor Philip Drinker, who is also to be honored today, participated with Dr. Lanza in the early discussions as to the advisability of forming an association for the study and lessening of the hazards of silicosis and other airborne diseases. We should not, however, overlook the active part and constructive help so freely extended by Dr. Roy Gardner of Saranac Laboratories, and by Dr. Edward R. Weidlein, President of Mellon Institute, without whose guidance and financial assistance the Air Hygiene Foundation would not have been organized in 1935. The name of this Association was changed in 1941 to the Industrial Hygiene Foundation.

WHEREAS The Industrial Hygiene Foundation of America, Inc., which was incorporated in 1941 as a nonprofit research association of industries for the advancement of industrial health, improvement of working conditions and human relations of the people who work, traces its origin to the Air Hygiene Foundation of America, Inc.; and

WHEREAS Dr. Anthony J. Lanza was among the prime movers in establishing the Air Hygiene Foundation as a fellowship of Mellon Institute in 1935; and,

WHEREAS It was Dr. Lanza's outstanding accomplishment in identifying the etiology of silicosis (also called Lanza's Disease) which lead to his being involved, and his concern with preventive medicine which resulted in Professor Drinker's being consulted in the identification, evaluation and engineering control of environmental hazards from silica; and

WHEREAS It was Dr. Lanza's leadership as Chairman of the Foundation's Medical Committee which led to the publication of the first Medical Series Bulletin of the Foundation entitled: "Silicosis and Allied Disorders" in 1937, and numerous other contributions until his retirement in 1952; and

WHEREAS The health of the people who work has also been greatly advanced through application of the principles of occupational health, in which Dr. Lanza pioneered, to the control of hazards other than those related to silica in industry; a

WHEREAS We of the membership and Board of Trustees have lost a highly esteemed associate and congenial, admired and valued personal friend through the death of Dr. Lanza, who served as Trustee of the Foundation from 1942-1959; and

NOW THEREFORE BE IT RESOLVED In this 29th Annual Meeting of the Industrial Hygiene Foundation of America, Inc., that we regret the loss of our frien and founder and commend his high character and integrity as an ideal of personal conduct and as an example in the management of this enterprise; and

BE IT FURTHER RESOLVED That out of respect for the memory of our deceased friend and in recognition of his valued services to the Foundation, we do now direct that these resolutions be spread upon the minutes of this meeting and a copy of them be sent to the family of Dr. Lanza as a token of our sympathy.

A motion was made, seconded by Mr. Waters, and unanimously carried that this resolution be adopted.

Dr. Anna M. Baetjer read the following resolution proposing Professor Philip Drinker for election as Trustee Emeritus:

"Professor Philip Drinker was one of the farseeing men who were responsible for the formation of the Industrial Hygiene Foundation (originally the Air Hygiene Foundation). He organized and chaired the Preventive Engineering Committee from its beginning until October, 1959 and he was a member of the Board of Trustees from October, 1942 to October, 1959. During the early period, Professor Drinker was in close contact with the day-to-day work of the Foundation and participated actively in developing its program. Undoubtedly, Dr. Drinker's reputation was the basis for the confidence of the Foundation membership in the early industry studies which were made on the control of silicosis.

154A Braun Dep Ex #2004. 4/29/81 DB

Published by AsbestosClaims.Law
asbestosclaims.law/library/25165/3

Dr. Drinker brought to the Industrial Hygiene Foundation the mind of a critical scientist, a background education in chemical engineering, and above all, an interest in applying his knowledge and techniques of engineering for the benefit of the working man. His activities in the application of engineering principles to medical problems were already famous because of his invention of the Drinker Respirator and his distinguished editorship of the Journal of Industrial Hygiene & Toxicology. In the formation of the Foundation, as in this Journal, Professor Drinker emphasized the importance of bringing together the chemical, physical, engineering, and medical disciplines.

Dr. Drinker was associated with the Harvard Medical School and the School of Public Health, beginning in 1922. In 1936, he became Professor of Industrial Hygiene, a position which he held until his retirement in 1960. Through his teaching, he has had a great influence in setting high standards of education and high ideals in the field of industrial health which were reflected in the activities of the Foundation under his direction; and

THEREFORE BE IT RESOLVED THAT The Board of Trustees and the membership of the Industrial Hygiene Foundation wish to honor Professor Drinker and to express their appreciation of the important contribution which he made to the organization and work of the Foundation by nominating him as Trustee Emeritus of the Industrial Hygiene Foundation; and

IT IS FURTHER RESOLVED THAT This resolution be placed in the minutes of meeting and that a copy be sent to Dr. Drinker."

A motion was made, seconded, and unanimously carried that this resolution be adopted.

Mr. Andrew Kalmykow read the resolution proposing Mr. Theodore C. Waters for election as Trustee Emeritus:

"Theodore C. Waters has, for many years, performed outstanding service for the Industrial Hygiene Foundation of America, Inc. and he was one of the original incorporators and directors of said Foundation and has served as its General Counsel since 1941 and a member of its Board of Trustees; and

WHEREAS He is and has been a member of the Legal Committee of said Foundation and its predecessor, the Air Hygiene Foundation of America, Inc., since 1936 and Chairman of its Legal Committee since 1941; and

WHEREAS He is a distinguished member of the Maryland Bar which he has graced both as an active practitioner and a professor of law and has long been one of the outstanding authorities in the United States on the subject of occupational disease legislation and litigation and has written widely on these subjects. He has served as a member of legislative and gubernatorial commissions dealing with these subjects having been Chairman of the Maryland Occupational Disease Commission and presently being a member of the Governor's Committee on Workmen's Compensation and has otherwise distinguished himself both in his home state of Maryland and others;

Published by AsbestosClaims.Law
asbestosclaims.law/library/25165/4

NOW THEREFORE BE IT RESOLVED That Theodore C. Waters be honored by being designated Trustee Emeritus of the Industrial Hygiene Foundation of America, Inc.; and

BE IT FURTHER RESOLVED That this resolution be spread upon the minutes of this Annual Meeting as a permanent record of said Foundation."

A motion was made, seconded, and unanimously carried that this resolution be adopted.

The Chairman then called on Dr. Joseph Treon, Chairman of the Nominating Committee, to report on this Committee's recommendations pertaining to: (1) The number of members of the Board for the year 1965, and (2) A slate of nominations for members of the Board to serve during the year 1965. Dr. Treon moved that the number of Trustees be set at 30. This motion was seconded and passed. He then submitted the names of the following persons as nominees for election to membership on the Board of Trustees:

Earle T. Andrews
Pennsylvania Glass Sand Corp.

Dr. Anna M. Baetjer
Johns Hopkins University

Robert D. Blasier
Westinghouse Electric Corp.

Lawrence A. Coleman
Allied Chemical Corp.

E. K. Davison
Davison Sand & Gravel Company

Dr. Robert T. P. deTreville
Industrial Hygiene Foundation

Andrew Fletcher
St. Joseph Lead Company

Theodore F. Hatch
University of Pittsburgh, GSPH

Ernst P. Hall
Consolidation Coal Company

J. S. Harrison
Aluminum Company of America

W. G. Hazard
Owens-Illinois Glass Company

Andrew Kalmykow
Assn. of Casualty & Surety Companies

Harold S. McFarland
General Motors Corp.

Dr. Robert B. O'Connor
United States Steel Corp.

Robert T. Ross
Ford Motor Company

Elgin D. Sallee
American Can Company

Dr. O. A. Sander
Marquette University

Dr. Ralph F. Schneider
Standard Oil Company (New Jersey)

Dr. H. H. Schrenk
Mine Safety Appliances Company

Dr. John F. Shronts
General Mills, Inc.

asbestosclaims.law/library/25165/5

Dr. G. R. Simmons
Western Electric Company

Dr. Joseph F. Treon
Atlas Chemical Industries, Inc.

Dr. Kenneth W. Smith
Johns-Manville Corporation

General Arthur G. Trudeau
Gulf Research & Development Co.

Dr. Henry F. Smyth, Jr.
Mellon Institute (Union Carbide Fellowship)

Dr. G. Arthur Webb
Mellon Institute

Douglas Soutar
American Smelting & Refining Co.

Paul S. Wise
American Mutual Insurance Alliance

Leo Teplow
American Iron & Steel Institute

Dr. John A. Zapp, Jr.
E. I. du Pont de Nemours & Co.

There being no other nominations, a motion was made, seconded and passed unanimously that the persons named in the report of the Nominating Committee be elected to serve on the Board of Trustees for the year 1965.

The Chemical-Toxicological Chairman, Dr. Treon, reported that the Chem-Tox Committee has assisted in preparation of the Management and Chem-Tox Conferences of the 29th Annual Meeting and has also assisted in programs designed to develop improved reporting of industrial clinical toxicological experience arising out of use of toxic materials in industry. An example of this is the discussional on phosgene held on September 17 at Mellon Institute, out of which need for further research in the field and laboratory were identified. Representatives of the Medical and Engineering Committees were invited and participated in this meeting. Plans are also underway to attempt to develop short-term exposure information and to validate threshold limit values, including that for phosgene, under conditions of use. During the year, Dr. Emil A. Pfitzer of the University of Pittsburgh Graduate School of Public Health and visiting fellow of Mellon Institute was appointed secretary of the Chem-Tox Committee. Mr. James M. McNerney, former secretary, left the Foundation to accept a position in industry. Dr. John Zapp was appointed co-chairman of the Committee. Membership of the Committee now includes:

Dr. Charles P. Carpenter
Union Carbide Corp.
H. H. Fawcett
General Electric Company
Harold R. Hoyle
Dow Chemical Company
J. C. Radcliffe
Ford Motor Company
Elgin D. Sallee
American Can Company
Dr. H. H. Schrenk
Mine Safety Appliances Company
Dr. Herbert E. Stokinger
U.S. Public Health Service

The Engineering Committee Chairman, Dr. Cralley, reported that his Committee had assisted in preparation of the Engineering Conference of the 29th Annual Meeting. In addition, the Engineering Committee met to re-evaluate its activity in line with the responsibilities suggested by the Policy and Planning Committee. It was the Committee's consensus that additional emphasis should be placed on holding small informal meetings among Industrial Hygiene Foundation members to discuss problems of special interest. Accordingly, the Engineering Committee sponsored two such meetings, one relating to air pollution problems associated with oven exhaust, and the other to the need for additional normative data for different age groups in order to compare noise-exposed populations to non-exposed populations. In addition to the above, the Engineering Committee has undertaken the sponsorship of a yearly discussional of about two days' duration to deal with the topmost industrial hygiene engineering problems at the time. It will be limited to member companies. The program subject material will vary from year to year and care will be taken to prevent any conflict with the objectives of the annual meeting. The first discussional, which will be held in January or February of 1965, will cover select areas in air pollution, noise and heat stress.

Other officers of the Engineering Committee are: H. Wilbur Speicher, co-chairman, and William J. Schreibeis, secretary. Membership includes:

R. J. Beaman, Jr.
The Procter & Gamble Co.
W. H. Kingsley
Sandia Corporation
Kenneth M. Morse
United States Steel Corp.
A. C. Pabst
Socony Mobil Oil Company
Kenneth E. Robinson
General Motors Tech. Center
Samuel H. Thomas
Owens-Corning Fiberglas Corp.
Herbert T. Walworth
Lumbermens Mutual Casualty Co.
George M. Wilkening
Bell Telephone Laboratories
Donald H. Winn
Johns-Manville Research & Engr. Center

The Legal Committee Chairman, Mr. Waters, gave the following respons to the action of the membership in electing him Trustee Emeritus: "May I respon to the very kind note that Mr. Kalmykow presented to this meeting. The Foundation has always been close to my heart and I deeply appreciate the thought of the membership and Mr. Kalmykow's remarks. To state that I have appreciated my relationship with the Foundation since its organization, is indeed an understatement. Thank you from the bottom of my heart."

Mr. Waters reported that the Legal Committee had assisted in the prepara tion of the Management and Legal Conferences of the 29th Annual Meeting. The Committee had also cooperated with other Committees in preparing the Emphysem Symposium and a discussional on industrial conservation of hearing.

The Legal Committee secretary is Mr. Andrew Kalmykow * and membership includes:

* Note: Mr. Kalmykow has subsequently been appointed the additional duty of co-chairman of the Legal Committee.

The Chairman of the Medical Committee, Dr. Braun, reported that the Medical Committee had assisted in the preparation of the Management and Medical Conferences of the 29th Annual Meeting and has also assisted in the Emphysema Symposium, and discussionals on conservation of hearing, and phosgene. Out of each of these meetings have come indications for needed research in the laboratory and/or the plant. The Committee also assisted in the NISA Health and Safety Seminar, out of which has developed several areas of possible Foundation assistance to small plant occupational health programs. The Medical Committee has also lent support to the Foundation's nursing education experiment and toward the development of a fellowship program in occupational medicine at Mellon Institute.

Dr. Dernehl is co-chairman and Dr. Gross the secretary; other members of the committee are:

Dr. Roy L. Gibson
Gulf Oil Corp.
Dr. Lee B. Grant
Pittsburgh Plate Glass Co.
Dr. Robert J. Halen
Jones & Laughlin Steel Corp.
Dr. James P. Hughes
Kaiser Aluminum & Chem.
Dr. E. M. Kline
General Electric Company
Dr. George Roush

Dr. O. A. Sander
Marquette University
Dr. S. D. Steiner
General Motors Corporation

Mrs. Jean W. Gray reported for the Chairman of the Nursing Committee, Mrs. Jane Lee. The Nursing Committee was formed in 1963 to help supervise performance of a single but significant task: To explore means for improving competence of nurses in counseling workers with emotional problems. An experimental course entitled: "Employee Mental Health and Industrial Nursing Practices" was developed and conducted in 1964. Supervisory nurses from member companies of the Foundation were invited to attend. There are nine participants; eight from industry and one from the National Institutes of Health. The course consisted of a continuation of study which began with a six-day group session in June. Study materials and project work were applied on-the-job by participants between June and October. A final group session of two days will be held here, at the Institute beginning tomorrow. From visits by the faculty with each member of the course in

Published by AsbestosClaims.Law
asbestosclaims.law/library/25165/8

her work situation and from evaluation of written project materials, there are many evidences of change in nursing practices and knowledge.

A remarkable feature of the project has been that of voluntary contributions of many talents and time squeezed out of fully committed schedules of people with other full-time jobs. Through cooperative efforts of the Managing Director of the Industrial Hygiene Foundation and the Chief, Division of Occupational Health, U.S. Public Health Service, I have been assigned the task of planning and directing the course with the administrative assistance and support of the Industrial Hygiene Foundation. Consultation, actual teaching, and hours of developmental work have been contributed by members of the Nursing Committee, the faculty of University of Pittsburgh Graduate School of Public Health, Western Psychiatric Institute, American Institute for Research, and psychiatrists from U.S. Steel and Jones & Laughlin Steel. Encouraging these efforts, and sometimes counseling or listening to us were Trustees of the Foundation and other executives of its member companies.

An immediate beneficial effect of the course is the interest of its participants, some of whom are also members of the Nursing Committee, in more definitive identification of functions of nurses related to employee mental health and in developing methods to improve practice in those functions. In other words, member companies of the Foundation now have a nucleus of nurse leaders who, in sharing one approach to the solution of a problem, may continue to combine their talents in more effective problem solving. Results of their efforts would be potentially available to all member companies. Belief in worth of the tasks undertaken has been the principle source of support, for we have had no visible budget. We are now confident of having defined an approach that will merit far greater effort—and indeed, more visible and tangible support.

Miss Bedonna Jacobs has served as secretary of the Committee and members other than myself and the chairman are:

Dorothy L. Dean
Jones & Laughlin Steel Corp.
Vivian M. Hatfield
Trans World Airlines
Jeanne T. Healey
Western Electric Company
Helen K. Kunzler
United States Steel Corp.
Winifred McLanahan
University of Pittsburgh, GSPH
Adele C. Miller
General Electric Company
Alda H. Sica
United States Steel Corp.

In the absence of the treasurer (because of illness), Mr. Davison presented the treasurer's report. He reviewed the estimated financial picture for 1964, calling attention to the need to balance the Foundation's budget in 1965 if the programs of research and education planned are to proceed. In 1963, it was noted that we should anticipate an operational deficit in 1964 to allow Dr. deTreville to help the Foundation make the transition into more active programs of research and service for the bene-

003070

Published by AsbestosClaims.Law
asbestosclaims.law/library/25165/9

of its members and of industry generally. The 1964 budget anticipated a $15,000 deficit unless the money could be developed from dues. It appears that there has been only a slight increase in dues; also expected income from Engineering services has materialized only about 15%, so that the combined deficit may be well over $20,000. With limited financial reserves, obviously the Foundation cannot tolerate such deficits over another year or two. It would be impossible to further reduce the Foundation's professional and technical staff without greatly curtailing functions of the Foundation. Additional factors include pension benefits and competent "back up" for certain of the present Foundation's staff. These important matters will be discussed in a meeting of Trustees later in the day. The membership will be advised of progress and of ways in which it may be of help.

Mr. Davison announced that a year's end financial report will be made to the Board of Trustees after the first of the year. (See page 10).

Mr. Davison next called on Dr. deTreville for the Managing Director's report:

Dr. deTreville read from a proof of a Guest Editorial on the Foundation from the Journal of Occupational Medicine (JOM), to illustrate widespread recognition of the importance of programs planned for the Foundation from 1965-1970. (This editorial appeared in the December, 1964 issue of JOM. A reprint is attached).

He further stated that each of the programs planned had been suggested by management representatives in the Foundation's membership and that the work outlined is expected to produce considerable benefit to the Foundation's membership and to industry generally.

He indicated his intention to ask member companies to provide support for introduction of the new programs beginning in 1965. With a firm basis of support in its membership, the Foundation can make even greater contributions to the advancement of healthful working conditions in industry in the future.

There was no discussion, and no further business. The meeting was adjourned at 12:10 p.m. by the Chairman.

H. H. Schrenk, Ph.D.
Secretary

29th ANNUAL MEETING

The 29th Annual Meeting of the Membership of Industrial Hygiene Foundation was held as usual during the third week of October, to review progress of Foundation programs and to elect the Board of Trustees. The 30th such meeting will be held on October 20-21, 1965.

At the Meeting, as a means of aiding its members in keeping abreast of important progress in all phases of occupational health, conferences are scheduled. Speakers are outstanding representatives of management, specialty fields of occupational health or compensation law.

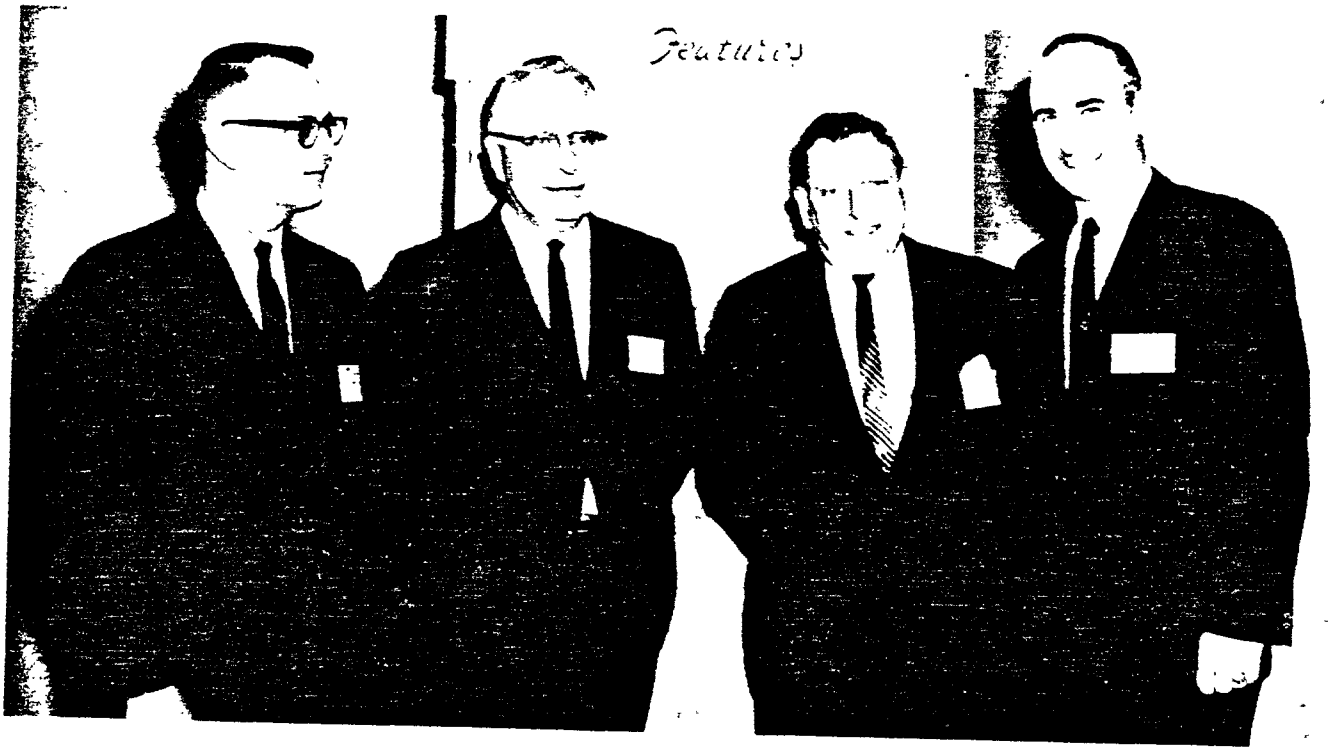

Transactions are published in the American Medical Association Archives of Environmental Health and distributed free to members or sold at cost by the Foundation.

The Annual Meeting, which is open to guests as well as members, is intended to help disseminate useful information to assist in the advancement of occupational health programs throughout industry. In addition, it serves as a means of interesting potential members in supporting Foundation programs of research and education in occupational health.
