BOOKLETS - AIA

Johns-Manville

Internal Correspondence

To: Christy Snyder 2-18

Date: January 15, 1982

From: J. F. Reis

Copies: W. B. Reitze, chrono/file

Subject: SAFETY PAMPHLETS
YOUR LETTER TO W. B. REITZE 1/11/82

Of the three pamphlets attached to Steven Schwartz's letter of December 31, 1981 J-M was involved only with the development and production of the AIA publication Recommended Work Practices Shop and Field Fabrication of Asbestos Sheet Products.

Ed Fenner who was with HS&E at the time served as chairman of AIA's technical committee and as such supplied most of the information that went into the booklet. The booklet was first published in late 1975 and provided to OSHA and EPA personnel as well as publicized in various trade publications as being available. Copies were distributed by producers of asbestos products including J-M to their customers.

We did not participate in the writing of the other two publications.
